

Solar Pole product range

Solar AD pole 2000 P200-215 2xAD100D

The range **Solar AD pole**© integrates state of the art technology for the Out-Of Home (OOH) industry.

The **Solar AD pole 2000**© (**P200-215 2xAD100D**) comes equipped with the latest LED technology for optimal retro lighting, powered through the unique worldwide patented photovoltaic technology "power tube™".

The **Solar AD pole 2000**© (**P200-215 2xAD100D**) offers optimal balanced light distribution on the poster, ideal for modern applications in the OOH industry. When recharged at 100%, it can ensure optimal operation during 6 to 8 nights. Also available with hybrid connection.

The intelligent energy management (microprocessor) device of the **Solar AD pole 2000**© (**P200-215 2xAD100D**) ensures optimal and continuous operation, even in poor weather conditions, dim light and weak sunshine.

Options:

- Standard finish of the mast is in galvanized steel.
- Coating with color RAL 9005 or 9006 will be charged extra.
- The rest of the RAL color palette can also be selected but at additional cost, based on quotation.
