

Solar Light product range

Antares 8000 P400-215 2xAD100D

The range of **Antares©** solar lighting system integrates state of the art technology for the public & private outdoor lighting industry & for the Out-Of-Home (OOH) media industry.

The **Antares 8000© (P400-215 2xAD100D)** comes equipped with the latest LED technology, offering a luminous efficiency between 134-136 lm/w on the ground and is available in a solar or hybrid version.

The **Antares 8000© (P400-215 2xAD100D)** lamp is fitted with a single light head, powered by the unique photovoltaic "power tube™".

The **Antares 8000© (P400-215 2xAD100D)** offers optimal balanced light distribution, ideal for modern applications in public lighting. It is particularly well suited for lighting of arterial and secondary roads, public squares, medium sized open spaces, railway crossings, etc.

The intelligent energy management (microprocessor) device of **Antares 8000© (P400-215 2xAD100D)** ensures optimal and continuous operation, even in poor weather conditions, dim light and weak sunshine.

Options:

- Standard finish of the mast is in galvanized steel.
- Coating with color RAL 9005 or 9006 will be charged extra.
- The rest of the RAL color palette can also be selected but at additional cost, based on quotation.
- Motion detector.
